

## Block 58 – Revelation 16:17-21

### Tips for Block

Use a grey for the stormy sky, green for the ground, and a red or orange (lava?) for the earthquake cracks. Fussy cut 10-12 small houses and then cut the houses into pieces and place them in piles, showing the damage following the earthquake. You can just about cover up the line between the sky and the ground with pieces of the houses. The white balls represent the 100 pound hailstones; you may iron on a piece of fusible on the back of white fabric and then cut freehand balls about the size of those shown above.
